🟧 KOMKOM – MVP PRODUCT DOCUMENT (REVISED)

One-Way Buyer Marketplace

1️⃣ Overview

KomKom is a B2B ordering platform for hardware store owners to:

Create a business profile

Browse available products

Place orders

Receive delivery

This is a controlled marketplace:

Only Admin manages products and pricing

Buyers cannot upload products

Buyers cannot edit inventory

Buyers only place orders

2️⃣ User Roles & Permissions

👤 1. Hardware Store Owner (Buyer)

Can:

Create account

Edit business profile

Add employees

Browse product catalog

Add products to cart

Place orders

View order history

Track order status

Cannot:

Add products

Edit product pricing

Upload inventory

Modify catalog

See supplier info (optional for MVP)

👷 2. Employee (Under Store Owner)

Employee belongs to one store.

Can:

Log in

Browse products

Add to cart

Place orders

View order history

Cannot:

Edit store profile

Add employees

Change pricing

Access admin panel

🛠️ 3. Admin (KomKom Team)

Full control.

Admin can:

Create/edit/delete categories

Create/edit/delete products

Set pricing

Set availability

View all stores

View all orders

Change order status

Assign delivery

Add delivery fee

Suspend accounts

Export data

Admin controls the marketplace.

3️⃣ Core MVP Features

A. Buyer Onboarding

Fields:

Full name

Company name

Activity

Phone number

GPS location (lat/long)

City / Zone

Account created immediately.

B. Product Catalog (Admin Controlled Only)

Admin defines:

Categories (Ciment, Fer, Peinture, etc.)

Products:

Name

Category

Unit (bag, ton, piece)

Price

Stock status (Available / Not Available)

Optional image

Buyers can:

Browse by category

Search

View price

Add to cart

Buyers cannot modify products.

C. Ordering Flow

Buyer flow:

1. Select product

2. Choose quantity

3. Add to cart

4. Review cart

5. Confirm order

System generates:

Order ID

Store info

GPS coordinates

Item list

Total amount

Status = Pending

D. Order Status System

Statuses:

Pending

Confirmed

Preparing

Out for Delivery

Delivered

Cancelled

Only Admin updates status.

Buyer sees real-time updates.

E. Delivery (Manual MVP)

Admin:

Assigns delivery

Adds delivery fee

Updates delivery status

No driver module yet.

4️⃣ Required Screens

Buyer App

1. Welcome

2. Signup

3. Login

4. Home (Categories + Search)

5. Product list

6. Product detail

7. Cart

8. Order confirmation

9. Order history

10. Order tracking

11. Profile

12. Employee management

Admin Panel

1. Dashboard

2. Product management

3. Category management

4. Order management

5. Store management

6. Basic analytics

5️⃣ Database Structure (Simplified)

Tables:

Users

Stores

Employees

Categories

Products

Orders

OrderItems

Relationships:

Store → many Employees

Store → many Orders

Order → many OrderItems

Product → one Category

6️⃣ What We Are NOT Building in MVP

Supplier portal

User product uploads

Marketplace messaging

Online payment

Credit

Multi-warehouse logic

Driver app

Advanced reporting

7️⃣ Why This Is the Right MVP

This model allows you to:

Control pricing

Control quality

Protect margins

Test logistics

Validate demand

Avoid supplier chaos
